

# EuroScience Open Forum 2004

## Highlighting Science, Technology & Innovation in Europe

**E**uroScience Open Forum (ESOF 2004) is the first pan-European scientific meeting to showcase the best in cutting edge research ever staged in an interdisciplinary forum for open dialogue and debate on science and technology in society. Its mission is to bring scientists from all fields, and people interested in science and technology, from across Europe and beyond to one meeting. The participants will be Nobel laureates, young scientists, academics, teachers, students, policy makers, the media and science-based industries. ESOF 2004 will be held at Stockholm City Conference Center in Stockholm, Sweden, 25-28 August 2004.

The event will include:

- More than 250 speakers from 33 countries
- More than 80 scientific workshops, symposia and plenary lectures of cutting edge science from nanotechnology to climate change, science policy, medicine, arts, culture and language.
- Full press programme, press briefings, newsroom and computer service
- Reception at the Stockholm City Hall
- Events and exhibitions by pan-European science and research organisations
- Science theatre, science café, speakers corner
- Interactive exhibitions in the city and the museums of Stockholm
- Interactive food science demonstration at shopping mall
